

readar.eu

No time to read news? Listen to it!

Readar is a personal news reader that brings people together to talk about the world.

It helps you keep up with your top information sources - content comes straight to you, saving you the time to go and check every site on your own.

With Readar you can also monitor news about specific keywords, save article for viewing later.

Too busy to read all those articles? Now you can listen to them while you do other things, thanks to Readar's excellent new text-to-speech (TTS) feature.

No time to read news? Listen to it!

Store your content

Browse, select, store the content that you are interested in. You can always read it or built-in voice synthesizer application can do it for you. Synchronize content you have on your smartphone to your computer and read it whenever you want.

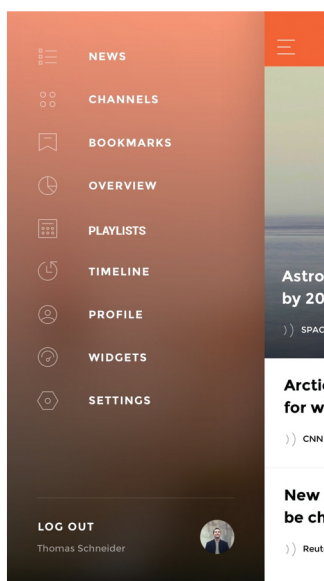

Listen to your articles

Enjoy your content via Text-To-Speech. Send it via Bluetooth to other devices such as Bluetooth headset, car radio, transmitter, etc. Discover how nice it is to listen to your favourite articles while driving or during the journey.

More personalized experience

Always reach out to interesting articles categorized according to your interests and expectations. Browse top rated articles, local and the world breaking news. Create your own playlists and share it with friends.

Automatic content selection

Readar brings you the **best stories** from all over the world. The app, thanks to its intelligence, selects the most suited articles for you. It analyzes your categories, keywords, authors and suggests content that you may be interested in.
